LAE SAME DAY A large aquarium opened to the public in Georgia, X after train day commuter train late stuck on Chicago RR tracks, a train hit cars, at least a few critical injuries occurred. Lastly that evening on national TV, at the Bowling Green vs. Toledo college football game, a cotton-tailed rabbit appeared in an end zone, & about 10 mins. later, probably at the opposite end zone (of camera angles), the offence at the 8 yd. line, near scoring, fumbled unusually about 6 yds. forward thru the center of the line, & the defence recovered. Some days before, I'd sent over a dozen letters to government authorities, predicting a series of multiple disasters in 4 days in the last wk. of Nov. '05, & my prediction realized, there were a many more than usual quantity of disasters &/or near disasters in those 4 days & one in between (the 26<sup>th</sup>). I've observed patterns of phenomena, frequency progressions, studies of the "Facts on File" library News Encyclopedia's index: Accidents & earthquakes, in the previous year, of 18+ more yrs., books on shelves... proving apocalyptic ultimatums &/or of perfecting harmony with non-violent reforms, i.e. INSOMNIA, confusion, &/or violence-contemplation 100% remedial variable quantities of 10-20% SWEET WINES, &/or exercise & baths... self control, happiness, morality & prevention of violence.

Four of 15 incidents were trains colliding with cars or trucks (two: two), fatalities in each of 4, 11 were d-rls. (probably all non-fatal) Any few incidents I missed wouldn't significantly effect the statistical & obvious facts & validity of the 'matching' numerical analysis following: Two days after the Chicago by Lake Michigan collision, a d-rl. near-by, so. of Chicago not far from a river, on 11-24... then 11-26, d-rl., Scotland, & 11-26, d-rl., Laurel, MT. (at 3:22 AM), 2 days later; 7 mo. 8 days later (220 days), 7-2-'06, 1 d-rl., MT. & a slow non-fatal collision of 2 commuter trains, PA., from 11-24-05, & 11 days later (ts: timespan), 12-5-05, d-rl., MT. (Helena). I figured ('the stats') the time spans beyond a wk. & 4 days between each of the d-rls. & crashes from 11-24-05 to 7-2-06, & approximately exactly, beyond 98% careful numeric analysis by a poet (I can miss a number or few), of 37 time spans measured in days, I found 11 matching 'digit-11' factorable (evenly divisible by 11) TSS (timespans) statistically, logically, i.e. 88 days between 3-3-06 & 5-3-06, 122 days between 1-28 & 5-30; the time spans together look like: 11d, from 11-24-05, 220d, 66d, 122d, 155d, 99d, 44d, 88d, 11d, & 11:37, or ~80% probability ratio statistically 'figures' from a 1:10 probability of one factor 11 matching pair of digits per time span of the 220 day sample, logically & reasonably, proof of non-human intelligences' volitional egomixes, crop & biologic growth, & Abused &/or forced errors, but communications by those entities by numeric redundant consistencies... like a horse pawing the ground twice & whinnying for alertness & change. Similar high % proofs, over 500:1 volitional communications ratios resulted comparing 18 yrs. & beyond other disaster dates & frequencies, of 80's, 90's, 00's plane crashes & gks., & from Jan. '06, \*

June '06: TRAIN-CAR collision, 6-9, then 4 d-rls., 11/1d., 16<sup>th</sup>, 18, 20, 27<sup>th</sup> (Proven (above)): Consistency proves goodwill, form a 1:3:1 pattern, TSS: 7-1-2-4-2-7d, zebra & fish noses, geometric-hexagon arrows & webs; Also 2 11d. TSS, 9/2-20<sup>th</sup>; 16<sup>th</sup>-27<sup>th</sup> 2 quinoxes are volitional, clouds are 2 months, ts between 2 16<sup>th</sup> day/mo. CONSCIOUSNESSES, pets, KNOW CALENDARS, numeric RR incidents, 4-16 (train-truck crash) & 6-16 (d-rl.) & 16d. TSS, 6-16-7-2d-rl. digits & some of the alphabet, from ORIGINS, & The 2nd 6-06 d-rl. on the 18<sup>th</sup> matches AN 18d. TSS, 6-9 to 7-2-06, d-rls. & a 3rd 6-16 (d-rl.) & 16d. TSS, 6-16-7-2d-rl. digits & some of the alphabet, from ORIGINS, & temporary consciousness merges... ALSO IN & OF SLIGHT COLLISION, 2 PA. COMMUTER TRAINS. A dozen pyramids built w/ language in antiquity... A partial sample of wks.td., mons.-td., especially, the climate failures by the Nile & western U.S. 6/12-26-06 indicated similar 70% good & certain probabilities; the E. & W. Tidal waves of SUMATRA: Proximities, geographically of reptiles & large cat overtime violent like metal fur trapping, fur harvesting organizations near 2 centuries of war each 20 yrs., etc. etc., diminishing orderly control & less harmonious influences of the 4 SEASONS crop & biologic growths vs. every 1-3 to 9-17-06, 1000s vs. between a huge electric current triangle, TN-LA-ALABAMA, the national weather map - TV.

There's a time span of 1001 days between May 12, 2006, the start of the N.E. USA's days of HEAVY RAIN & FLOODING & the huge electric power outages around Lk. Erie, U.S.: N.Y. City & Canada, 8-14-'06

Rising precipitates excessively - below ~72° air conditioning globally over decades, flooding, ms., mudslides, ice age freezing trends since ~early & later '90's, droughts & blights are certain w/ air conditioning everywhere customarily, except long driving, for fundamental healthy natural warm systems, & large systems established long ago & early/centuries cooling, captivities, metal fur trapping & d-rls., & crashes (trains & cars or truck collisions, four, noted c): 11-22-05; 11-24-05; 11-26-05; 1-28-06; 3-3-06; 4-16c; 5-30; 6-9; 6-16; 6-18; 6-20; 6-27; 7-2-06

\* From Jan. to mid-June, 10 pairs of AVIATION CRASHES & significant disfunctions occurred: 4 pairs on the same day (4 different dates); 4 pairs in adjoining, next day - 48 hrs.; one pair w/ 2 days between (72 hrs.) & one pair w/ 4 days between. Root, building, & mine collapses, from Feb. to mid-MAY occurred in similar patterns, 8 pairs: 4 same-day pairs; one 4 day & one 5 day pairs; the other 2 pairs were within one of a few days of each other, & inclusively, triples (1/12-27 toronto); 1. A. roots & 1-29 (on min. fire CANADA, 6cc 8 pairs: two triples), two of 8 or 9 Con. min. & disasters (one was a forest fire) at same wires or an unstable wall) occurred on the same numeric day - the 19<sup>th</sup> - Feb. & May.

8-10-'06: From July 1-Aug. 8 (7-10-8-8), ~5 wks., an astounding 14 to 18 matching similar pairs of \* heat & disasters w/ cusps & 3 triples, including, adjoining 2 day E. gks. & 2 fatal lightning strikes, New Jersey & Billings, Montana; 2x7-8, fatal plane crashes.

Exhibit 2 - 1-8-07 : THA : 11B2

*Reaching great numbers along the coast, they spread new loops from both sides of the mountain range, offering a "link" between the two great ice fields. Small American Indians, however, have been able to penetrate the mountains, and their descendants now form a large part of the population of the region.*

In '91 & '92 (2-29 & 10-9) two more engines failed 2 flying fatalities. The var. nos. were day time spans. It is extremely logical in my opinion that some statistical method
